

Greeting

Dear Colleagues,

As a congress president of the Japanese Society for Regenerative Medicine, I cordially invite you to the international symposium for young researchers which will take place on 12th June, 2012 in Yokohama.

In this meeting, I would like to exchange recent results of our research works on cardiovascular tissue engineering, and make fruitful discussion for the further development of new technologies and methods that open the doors for completely new possibilities of patient-specific treatment.

I am looking forward to seeing you soon in Yokohama.

Yoshiki Sawa. MD. PhD.
Professor and Chairman
Department of Cardiovascular Surgery
Osaka University Graduate School of
